IELTS Speaking

Presto AI uses leading speech recognition technology designed specifically for assessing pronunciation and fluency.

Our vision is to make practising and improving speaking possible without intensive 1 on 1 instruction.

AI provides immediate pin-pointed feedback on mistakes at word level. This helps motivate and engage the learner to listen, hear mistakes, and then try again. There is no limit to how many times a student can practice the 30-second scripted voice recordings.

30-second speaking blocks bring out the best test results without being overwhelming.
