What people are saying

I let my students practice on their phone. Engagement is 100%
Nan GeryUSA

These libraries are great. They are challenging, they fully auto answer, no marking for me and the students love the interface. I simply pick a few per week and send them off with some revision. It's so easy and they work!

Mario RossAbu Dhabi

The best part is I can bring these decks into my library, add some fun like Glifys and have a laugh while doing Grammar practice.

SPEAKING SKILLS coached by AI

Scribo employs best-in-class speech recognition technology designed specifically for assessing pronunciation and fluency.

Our vision is to make practising and improving speaking attainable without intensive 1 on 1 instruction.

The technology provides immediate pin-pointed feedback on mistakes. This helps motivate and engage the learner to listen, hear mistakes, and then try again. There is no limit to how many times a student can practice the 30-second scripted voice recordings.

30-second speaking blocks bring out the best test results without being overbearing.

The Presto ENGLISH SPEAKING library

Presto Learning has a comprehensive library of English core speaking activities.

Teachers:

- search the library, selecting an appropriate level of speaking practice activity.
- quickly share the activity to the Class via a QR code, or links into Google Classroom, Teams, WhatsApp, or other social media sites. Each share code can require user login or be shared with anyone with a link.
- All learning activities are compatible with desktop and tablet, and optimised for mobile delivery.
- Teachers get statistics on usage, access and student scores.

Students:

- can practice with a 1 on 1 instructor, anywhere, anytime.
